

Halogen free cables

Structure:

Conductor:

Tinned copper wire

Solid 1.00 ÷ 2.00 mm

stranded 1.00 ÷ 6.00 mm²

Insulation:

Thermoplastic material, halogen-free

Radial thickness: 0.7 ÷ 3.1 mm

Characteristics

Operating temperature:

-25.....+70°C

Working voltage:

750/1500/3000 V

Insulation resistance:

Min. 50 MΩ Km

Flame retardant

Low emission of toxic gases

Applications:

Domains that require safety conditions with respect to fire behavior and low emission of toxic gases.
