

The Icpe Special Electrical Machines Department, began working with the French company **ISO FOP** - which is the distributor of SAFRAN Turbomeca systems.

The collaboration aims to develop a subsystem that will be part of the equipment installed on the new generation of engines developed by Turbomeca.

In addition to this, from November 27 to November 29, 2012, Icpe will be present at the SPS IPC Drives 2012 trade fair that takes place in Nuremberg, and represents the field of automation systems and components. The Icpe Special Electrical Machines Department will be present with its products in The 3<sup>rd</sup> Hall, booth 564.
